

VVER-440 Licensing workshop

An ESSANUF's VVER-440 Licensing Workshop was held in Prague at the ÚJV Řež offices on June 15-16, 2016. Members of the Regulatory Bodies and Utilities in the countries operating VVER-440 NPPs (Finland, Czech Rep., Hungary, Slovak Rep. and Ukraine) were invited to participate at the workshop and to provide input to the proposed licensing scope. All the regulatory bodies, with exception of the Czech Rep., and all the Utilities, with exception of Energoatom, attended the workshop, see Figure 1. Valuable insight was gained regarding the licensing requirements in the different countries.
